Brief about me

Creative engagement is my nature. So I keep myself busy into the things that gives outlet to my creative fluids. It could be any out of the box idea to solve design problem, an UI or an icon.

My career started as a designer and worked for more than eight years. Initially I worked into Graphic Designing where exposure to e-learning industry shaped me to understand an approach towards UID. In my current professional life as a UI/UX Designer I had worked with many top clients serving many design solutions to craft web portals, web and mobile applications.

Creativity is the key element for any designer. Another important elements that fascinates me that is a design principle, "Form follows function". Anything you add to a design has to serve a strong purpose that meets the goal of a user. And so my approach towards my design is to solve a problem. Doesn't matter if the problem is smaller or bigger, for me its most important thing to resolve. This approach led me to hone my skills as a front end developer. In recent time I groomed myself into front end development so that I could translate design concepts and ideas into reality using front end technology. I look forward to hone my skills and adopt new technologies that could make me a digital thinker and an independent problem solver.

Apart from this Indian Classical Music (Hindustani) is been part of my life since my childhood. I learnt Vocal as well as Tabla. This passion offered me plenty of grand opportunities to share the stage with many artists and performed at reknowned music festivals.

TECHNICAL SKILLS & TOOLS

Technical Skill:

Usability Analysis, Wireframes, Prototype, Visual Design, User Interface Design, Design review, Customize iconography, Style guide.

Tools:

Microsoft Office, Adobe XD, Adobe Photoshop, Axure RP8, Adobe Illustrator, Sketch Figma, Affinity Designer, Balsamiq.

MY TECHNICAL SKILL MATRICS

PROFESSIONAL SUMMARY

My work encompasses various skills associated with usability including low and high fidelity wireframes, interactive prototypes, creating visual design mock-ups using various design tools.

Independently problem-solving and leadership are my sub-skills. Mostly I've worked on Web and mobile applications.

I participate in design reviews and provide design solutions. Has a strong knowledge with hand-coded HTML5, CSS3, Bootstrap 4.

TECH MAHINDRA PROJECT EXPERIENCE

1. Web Application Project Duration: 2.5 years

Project Description:

It is a platform that automates the collection, analysis, and testing processes of information on management systems. It then has the ability to enable a new, or upgrade the existing Network Elements configuration with the desired services with minimal or no manual intervention.

Role and Responsibility:

- Analyzed requirement and provided wireframe prototypes
- Developed design mockup with Landing page, dashboards with a sleek and innovative UI design.
- Worked on HTML CSS to make code repairs and optimize corporate applications.
- Customize iconography
- Visual design skills with sensitivity to user-system interaction with the latest UI trends, techniques and technologies

TECH MAHINDRA PROJECT EXPERIENCE

2. Web Application Project Duration: 10 months

Project Description:

It is a configuration-driven, end-to-end web application platform built by TechM as accelerator for our clients considering the low-code or rapid application development approach. It enables user to visually define their user experience on canvas allowing them to integrate/ configure data model, perform validations and interface with backend services with easy to use palettes.

Role and Responsibility:

- Analyzed requirement and provided wireframe prototypes
- Strengthened company brand and identity by creating distinctive Logo.
- Developed landing pages, dashboards with a sleek and innovative UI design.
- Customize iconography
